10x M1 x 4mm

14x M1.2 x 4mm

Bearings

4x 3x6x2

** If you DONT want to build car as RC, you don't need any bearings*

Prologue

Thank you

Thank you for supporting my hobby by buying this model. I had great time designing this kit and I hope you will have same building it and playing with it. Thanks small scale, it's very easy, cheap and quick to print and build.

More models can be found at
www.3drcmodels.com

Warning!

Please be careful! Kit contain lots of small parts that can be swallow by infant. Event after build is finished, small parts can be ripped off and can be dangerous. I don't recommend giving this toy to kid younger 3 years.
